Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-20 drawn to a recombinant fungal strain capable of expressing chitin deacylase and a method producing chitin deacylase using a recombinant fungal strain, classified in class 435, subclass 254.3.
- II. Claim 21-43, drawn to a recombinant yeast strain capable of expressing chitin deacylase, comprising and a method for producing chitin deacylase by a recombinant yeast strain, classified in class 435, subclass 254.2.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are two different products and methods of their use, wherein the methods have different modes of operation and are not disclosed as capable of use together.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1652

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
